

UBS

POINT OF SALES

Speed, Simplicity and Reliability

UBS Point of Sales (POS) is a PC-based comprehensive cash register specially designed for retail outlets and service-oriented businesses. **UBS P.O.S.** system is a highly flexible system whereby it can be operated with or without bar code equipment.

It is able to provide up-to-date inventory level information, sales personnel performance analysis, loyalty program, peak customer period analysis, product versus margins analysis, and receivables analysis.

FEATURES

Comprehensive Billing

It provides complete information to the management detailing cashier counters, salespersons, product items, indicated POS counter and mode of payment.

At the maintenance level, you only need to assign unique code, description, and other required information for every cashier, salesperson, supervisor, credit card payment, group, category, items or counter.

Accurate Transaction

The transaction for every sales made is being captured accurately. The system also provides information on deposit into and withdrawal from your cash drawer, for you to compare actual cash amount from your cash drawer.

Payment receives cash change for customers and daily store taking is recorded and accurately maintained.

Information

Able to re-print cash receipt, print bar-code labels and view reports.

Generate Reports

Able to generate reports, like cash receipts report, sales analysis report, salesperson performance report, and inventory report for management control. It ensures effective and efficient operations in an organization.

Security Management

It allows certain database to be viewed by selected individuals.
